

Project Lifesaver®

Caregiver Instructions

Client Name _____ Client Number _____
Transmitter Frequency _____

1. Check the condition of the band and test the transmitter every day. Use the radio transmitter tester you are provided. If a problem exists with either the band or the transmitter, call the Sheriff's Office right away. Call the non-emergency number. 785-841-0007 Day or night.
2. Always remember to sign and date the Daily Inspection and Test Log sheet. The log sheet will be reviewed during the monthly volunteer visits.
3. If the patient is missing, first check obvious places around the home or where you are located. If not found, notify the Douglas County Emergency Communications by calling 911. Advise the emergency operator you are a Project Lifesaver client, and give them your client number and contact information. Be ready to provide information about the missing person.
 - A. If at home, confirm your contact information and location with the operator.
 - B. If not at home, be sure to give a telephone number where you can be reached, and the location where we should respond.
4. The emergency dispatcher will contact the Law Enforcement agency that has jurisdiction and then the Sheriff's Office Patrol Supervisor. The supervisor will contact you as the patrol units respond.

Numbers to call:

For general information or problems with the equipment, 785-841-0007

Only if the client/patient has wandered and is missing, 911
